Education

Workintech, *Full Stack Development Program (6 months - 960 hours - 78 projects)*
2025 - 2026

Turkish - German University, *Computer Engineering, 3.38 GPA*
2016 - 2021

Languages

English, *Advanced*
German, *Intermediate*

Certificates

Full Stack Development, Workintech, 08.2025
Business Analysis & Software Testing, Yıldız Technical University, 11.2024
TOEFL (102 /120), 03,2021
DSH 2, 08.2016

Beyza CAN SERTEL
Front End Developer | Software Engineer

I'm a Frontend Developer with 4 years of experience creating clean, user-friendly, and visually appealing web interfaces. I've worked on several international projects and love collaborating with people from different backgrounds. I'm passionate about learning new technologies, solving problems creatively, and building things that look good and work even better. Excited to take on new challenges and grow in my next role !

SKILLS

Front End: Javascript, React.js, Hooks, Context API, Redux, Axios, Yup, Jest, Cypress, HTML, CSS, Tailwind Css,

Back End: Java, OOP, Data Structures, Design Patterns, Maven, Spring Core, Spring Boot

Additional: Algorithms, Debugging, Deployment, Problem Solving, Figma, Teamwork

EXPERIENCE

Qimia, *Istanbul - Front-End Developer*   2021- 2024

- Developed responsive and modern interfaces using Next.js, Angular, and Tailwind CSS
- Worked as an external consultant at FOSS, Denmark, for one year.
- In addition to development tasks, took an active role in understanding user needs and shaping features accordingly
- Communicated directly with business teams to clarify requirements and supported the planning of new features
- Helped define priorities and documented key details to support the development process smoothly
- Participated in Agile development using Scrum methodology

Ronwell Digital , *Istanbul - Front-End Developer*   2020 - 2021

- Developed frontend features using AngularJS and Angular for the AMER project at Dormakaba, Canada
- Collaborated with business analysts to refine requirements and ensure accurate implementation
- Took part in Agile ceremonies such as sprint planning and daily stand-ups, contributing to task estimation and prioritization
- Assisted in clarifying user flows and contributed feedback on feature usability
- Worked closely with international teams to ensure alignment on both business and technical expectations

SOFTWARE PROJECTS

Personal Website, *Frontend Developer* - React   **GitHub | Website**

- My personal website built using React + Vite.
- The goal is to have a lightweight, fast and SEO-friendly website that serves as my online portfolio/resume, showcasing personal projects, skills, and contact details.
- It's a demonstration of modern frontend best practices: component-based architecture, minimal dependencies, responsive design, and performance optimizations.

Pizza Order App,*Frontend Developer* - React   **GitHub | Website**

- A simple and user–friendly pizza ordering Single Page Application built with React and Vite.
- The project demonstrates form handling, validation, controlled components, UI updates, and API request simulation — making it a good example of core frontend fundamentals.

Twitter App, *Backend Developer* - SpringBoot | Java   **GitHub**

- This project is a simplified Twitter-like REST API built with Spring Boot. It allows users to register, authenticate, and perform basic tweet operations with secure access control.
- The main goal of this project is to practice Spring Boot architecture, Spring Security, JPA/Hibernate, and RESTful API design.
